Elena Rostova

Data Scientist | elena.rostova@analytics.org

Professional Summary

Data Scientist with 3+ years applying statistical modeling, ensemble machine learning algorithms, and hypothesis testing to solve customer churn and pricing optimization.

Technical Skills & Technologies

Languages & Tools: Python, R, Scikit-Learn, XGBoost, Pandas, NumPy, SQL, Statsmodels, Tableau, Git

Domain Competencies: Supervised Learning, Feature Engineering, Hypothesis Testing, Model Evaluation & ROC-AUC, Regularization

Professional Experience

• Data Scientist @ MarketMetrics (2022 - Present): Developed end-to-end churn prediction engine using XGBoost and Random Forests with 0.88 ROC-AUC. Performed extensive hyperparameter tuning using Bayesian Optimization.

• Junior Data Scientist @ RetailOptima (2020 - 2022): Engineered feature selection pipelines using L1 Lasso regularization to reduce dimensionality from 450 to 32 critical variables. Designed and evaluated A/B tests with strict statistical power analysis.

• Data Analyst @ StatCore (2019 - 2020): Analyzed customer lifetime value distributions, calibrated logistic regression probability outputs, and built automated reporting dashboards.

Education

M.S. in Applied Statistics, University of Michigan
